

HELP US RESTORE

OUR INCREDIBLE NORTHWEST FORESTS

Extensive logging, roadbuilding, fire suppression and other landscape alterations have significantly transformed much Northwest forestland. With a focus on critical wildlife habitat and corridors, your gift helps restore our forests so that they can once again function as healthy watersheds and thriving ecosystems, all while providing abundant opportunities for people to responsibly enjoy the land.

SPECIES PROTECTION

Protecting and restoring critical habitat for key species like fisher, wolverine, Canada lynx, spotted owl and marbled murrelet.

HABITAT RESTORATION

Restoring forest structure, protecting old trees, reintroducing fire and other restoration practices to bolster ecological resilience and natural forest processes.

POLICY ACTION

Educating and lobbying elected leaders to ensure pro-forest policies that protect habitat, improve watershed conditions and restore beneficial fire.

PLANTING

Planting thousands of native trees and shrubs to restore habitat in winter forage areas and near wildlife crossings.

FOREST ADVISORY

Serving as watchdog and partner of the U.S. Forest Service on major restoration efforts in our national forests like the Snoquera Project and Mount Hull.

MITIGATING DAMAGE

Repairing damage from illegal ATV use while collaborating with responsible recreation groups to prevent future harm to habitat.

MONITORING

Monitoring timber projects to ensure they abide by environmental regulations and uphold plans for improved ecological resilience.

ROADS & WATERSHEDS

Removing culverts and ripping out roads to repair watershed function and create safe habitat for bull trout and spawning Chinook salmon.

You can help to heal our forests by making a gift at www.conservationnw.org today!
